September

Dear Parents/Guardians and Students,

In a continued effort to better serve the students and parents in Millville Public Schools, we have implemented a computerized point of sale system in all of our school cafeterias. The system should speed up the lunch lines and make the payment process more convenient for everyone concerned. The following is a brief highlight of the point of sale system.

Each student has been issued a personal I.D. number. The most efficient method of operating the system is to prepay for meals. You now have the option to prepay for meals weeks in advance. The money will go into your child's debit account and is automatically deducted when they purchase a breakfast or lunch. You may even deposit additional money for Ala Carte items if you choose. The money is kept in an account in our point of sale system and is always accessible. For those who choose not to prepay, you still have the option of paying for each meal separately.

Another feature that we feel will be very beneficial is the accountability. We will be able to capture every transaction as it occurs. At your request, we will be able to furnish you with a detailed list of items purchased along with dates and amounts of prepayments for any time period requested.

Located at each cash register, students will see a keypad similar to an ATM. Simply put in your I.D. number and press enter. If you make a mistake, press clear, and re-enter the number. The cashier will total your purchase and collect the amount due, if any, at that time.

If you should have any further questions about the system or the lunch program in general please contact the Food Service Manager at the school in which your child attends.

Sincerely,

Kurt Himstedt
Food Service Director
